SUBJECT INDEX

(The numerals indicate the page.)

Acetylcholine competitive inhibition theory, quaternary NH_4 salts. 26.
Adenochrome-like pigment, polyzoa. 531.
Adenosinetriphosphate, decomp., *molgula manhattensis* tissues. 346.
Adrenal cortex extr., hypertension. 286.
starvation response. 527.
Alloxan, guinea pig resistance. 60.
Amebiasis, intestinal, hepatic, emetine. 362.
Amidone, D-,L-, iso-, cholinesterase. 352.
Amino acid adequacy det'n., protein hydrolysates. 51.
"Animal protein factor", plants. 432.
Anoxia, nicotinic acid. 642.
Anticoagulant, Na oxalate. 300.
Anticonvulsants, dilantin, mesantoin, 5,5-phenyl thienyl hydantoin. 584.
Antigen, embryo. 263.
Vi, thermostability, alcohol solubility. 455.
Arginase, liver, nephrectomy. 157.
Arthritis, rheumatoid, agglutination rbc. 1.

Bacitracin, oral. 395.
syphilis, penicillin synergist. 415.
Bacteriophage, pseudomonas aeruginosa, electromicroscopy. 451.
BAL, liver not protected, Uranium. 160.
Blood anticoagulant, lipid, brain. 110.
coagulation, asphyxia. 334.
Fibrinogen-Thrombin substrate. 55.
flow, digital, sodium tetrathionate. 34.
glucose, vagal stimulation. 97.
histamine, chromatography. 430.
p-aminosalicylic acid detn. 471.
Plasma methionine, oral administration. 296.
phospholipid turnover, diabetic dog. 6.
RH agglutinating antibodies, sodium azide, bacterial destruction. 534.
Serum albumin, intrav., renal function. 189.
cholesterol fractionation. 240.
histoplasmin antibody demonstration. 559.
lung penicillin, streptomycin inhalation, intramuscular. 213.
penicillin, procaine penicillin G. 658.
streptomycin detn. 450.
vasoconstrictor, enzymatic inactivation. 582.
volume. 511.
hypertension. 117.
Bone growth, pH. 288.
Brucella diagnosis, rapid antigen prepn. 546.
infection, gonadal hormones. 591.

Carbon* distribution, body, excreta. 233.
Carcinogen, sulfonamides. 330.
Casein, alcohol ext'd., nutritive value. 669.
Cells, sickle, electronmicroscope. 220.
Chloromycetin, man. 9.
typhus. 12.
Cholesterol inj'n., disappearance. 243.
Choline inhibition, adrenalin. 598.
Cholinesterase, D-, L- amidone. 352.
histochemical test. 354.
Chromosome stain. 604.
Convulsion susceptibility, age. 540.

Demethylation carcinogenic dyes, autoxidizing linoleic acid. 140.
Dengue, phlebotomus fevers transmission attempts. 193.
Dibenamine congener actions, sympathomimetic amines. 553.
renal hypertension. 425.
Diabetes, alloxan, dog. 120.
eye refractive changes. 257.
pancreatic, plasma phospholipid turnover. 6
phospholipoid utilization. 363.
Digitoxin, ventricular muscle contractility. 304.

Embolism, fat, oleic acid toxicity. 248.
Encephalitis, equine, serum treatment. 200.
herpes simplex, pption, anaphylaxis. 82.
Encephalomyelitis, isoallergic, Norcardia Asteroides potentiation. 373.
Louisiana. 70.
Enteritis, cicatrizing, giant-cell inclusions. 461.
Ergotoxine hyper-, hypothermia. 143.
Erythrophagocytosis, bone marrow, pteroylglutamic acid antagonism. 382.
Eye, resting, action potential. 169.

Fat, N absorption, absence external pancreas secretion, folic acid. 171.
Fluid, extracellular detn., insulin distribution. 507.

Gastric digestion, fetus. 327.
secretion, antrum resection. 473.
non-sp. protein. 90.
stimulant, Tween 20, inhibition, benadryl. 550.
Glucose transformation, intrav., exercise. 549.
Glutamine, beet root enrichment. 294.
Glycogen synthesis, bacterial endotoxins. 496.
Growth, liver extr. 122.

Hemobartonella muris morphology. 276.
Hemochromogens. 466.
Hemorrhagic disease, radiation induced. 505.
Heart arrhythmias, epinephrine induced, tetraethylammonium enhancement, 686.
dynamics, tricuspid insufficiency. 602.
inotropism production. 651.
output det'n. 543.
rhythm, intrathecal epinephrine. 520.
strophanthin, quinidine, conduction, electrical systole. 463.
Hippuric acid excretion, urine vol. 63.
Histamine paper chromatography. 430.
Hormone adrenocorticotrophic, growth, ketonemia. 349.
production, fetus. 487.

corticotrophin production, desoxycorticosterone. 529.
desoxycorticosterone, hypertension. 48.
epinephrine, choline inhibition. 598.
intrathecal, cardiac rhythm. 520.
estrogens, ovarian spiral arteries. 96.
skeletal reactions. 324.
thyroid. 485.
gonadal, Brucella infection. 591.
growth N retention. 94.
ovary, vaginal epithelium reactions. 537.
pregnenolones, antitumorigenic. 579.
cortical action. 578.
activity, oil vol. administration route. 92.
Hypertension, adrenal cortex extr. 286.
blood vol. sympathectomy. 117.
desoxycorticosterone. 48.
dibenamine. 425.
nonglucose reducing substs. 285.
Hypnosis, thiopental, diet. 260.
Hypophysectomy, N retention, growth hormone. 94.

Inotropism production, heart, intocostrin. 651.
Isuprel toxicity. 501.

Kala Azar, cold hemagglutinin. 72.
17-Ketosteroid excretion, estrone administration. 322.
ovariectomized rabbits. 320.
Kidney function, altitude. 475.
intrav. serum albumin. 189.
liver arginase. 157.

Lactation, mouse strains. 58.
Lactic acid b., vit. requirements. 648.
Lactobacillus acidophilus, vitamin antimetabolites, growth, acid prod'n. 620.
Leukemia, lymphoid, virulence, mitochondria. 336.
mouse, maternal lowering influence. 571.
urethane, x-rays, benzene, survival time. 377.
Liver, amino acid deficiency, hepatectomy. 137.
extr., pyridoxine, choline methionine content. 525.
phospholipids, fasting. 332.
Uranium injury, BAL. 160.

Mamma, infused streptomycin. 216.
"Medomin," smooth muscle. 343.
Methadon toxicity, age. 350.
Metrial gland, pregnancy, lactation. 492.
Milk agent antigen, precipitin test. 162.
Monocrotaline toxicity, diet, sex, testosterone. 317.
Morphine tolerance, liver. 262.
Muscular dystrophy, aminoaciduria. 131.
Myanesin distribution, disposition. 339.

Nerve gap bridging. 380.
Nicotine action site. 516.
Nucleoprotein, desoxyribose, pleural exudate. 179.

Ova development, transplanted, storage temp. 680.
Oleic acid toxicity, fat embolism. 248.

Pasteurella, pneumotropic. 46.
Penicillin aerosol, penicillin. 204.
cerebrospinal. 101.
distribution rate, lymph. 29.
intramuscular, inhalation, blood, lung conc. 213.
rickettsiocide. 228.
Phenyletherase. 477.
Phosgene poisoning, vagotomy, ECG. 279.
Phosphatase, acid demonstration, *Endamoeba histolytica.* 610.
Phrenicotomy, gastrointestinal mechanisms. 166.
Pneumonia, Friedlander, streptomycin aerosol. 210.
penicillin aerosol. 204.
Poliomyelitis, monkey, murine poliomyelitis virus, interfering agent. 19.
Polymixin assay. 301.
Porphyrins, neoplastic, embryonic, traumatized tissue affinity. 640.
Pregnancy, metrial gland. 492.
Protein hydrolyzate, intrav., oral, N retention. 480, 482.
utilization, trypsin inhibitor. 498.
Prostigmine, coryl, mecholyl action, intestine. 42.
Prothrombin activation, platelets, globulin. 225.
Pyrogen induced fever. 421.

Rabies vaccine, immune response. 609.
Rat, cotton, nutrition. 522.
Reproduction, desoxypyridoxine. 274.
Rutin, histamine shock. 569.
testis hyaluronidase inhibition. 566.

Saccharine, influence, sugar. 581.
Seminal vesicle, coagulating gland, fructose, citric acid secretion. 413.
Shaking device. 99.
Shigella sonnei, tissue invasion, gavage. 87.
Shock, burn, survival, saline, methionine-saline treated. 684.
histamine, rutin. 569.
Standing, ECG changes. 150.
Staph. aureus resistance, quaternary NH_4 compds. 401.
fibrinolysis, 246.
Streptobacillus moniliformis, joint involvement chemotherapy. 314.
Streptococcus desoxyribonuclease production. 184.
H., streptomycin resistance. 653.
Streptomycin aerosol, Friendlander's pneumonia. 210.
bacterial adsorption. 65.
infused, mamma. 216.
tuberculosis. 661.
Sulfonamide, carcinogen. 330.
3,4-dimethyl-5-sulfanilamidoisoxazole. 23.
distribution. 472.
induced resistance, α strep. 392.
sulfamethazine, testes, accessory glands. hypophysectomy. 488.

Sweating, adrenergic component. 40.
Sympathetico-adrenal system reactivity, anoxia electroshock, hypoglycemia. 74.
Synapse, blocking, protective actions amines, NH_4 compds. 174.
Syphilis, baeitracin, penicillin synergist. 415.
Thiopental hypnosis, diet. 260.
Thromboplastin, placental, refractory state. 594.
toxicity, trypsin inhibitor. 596.
Thyroid function, estrogen. 485.
vit. A, reticuloendothelial cell block. 255.
Toxoplasmins, dermal hypersensitivity. 634.
Treponema pallidum survival. 588.
Trypsin, hypotensive activity. 358.
Tryptophan deficiency. 672.
Tubercle b. growth, streptomycin, p-amino-salicylic acid. 250.
infection development. 625.
streptomycin resistance. 458.
Tuberculin toxicity, splenic explants. 407.
Tuberculosis, dietary lipids. 106.
Typhoid b., L type colony isolation, penicillin. 589.

Ulcer, histamine, age. 129.
peptic, celiac ganglionectomy. 369.
production, anemia, hemorrhage. 125.

Ventricular muscle contractility, digitoxin. 304.
Virus dengue, lab'y infection. 198.
encephalomyelitis, equine isolation, chick mites, lice. 622.
Influenza A, hemagglutinin, formalin-treated rbc. 448.
neutralizing antibody titration. 618.
PR8, rbc. electrokinetic change, adsorption. 385.
swine hemagglutination, egg-white inhibition. 442, 312.
MM growth, hamsters. 436.
mumps culture, pH, antibiotics. 308.
purification electron microscopy. 309.
Newcastle Disease, hamster. 293.
poliomyelitis convalescent, monkey resistance. 606.
human, infectivity, monkeys. 282.
infectivity, Murine SK. 266.
interference, simian, murine. 615.
isolation, stool. 593.
like, mouse, egg adapted. 80.
purification—methanol. 410.
rabies, chick embryo blood. 612.
vaccinial attenuation, adsorption. 400.
growth inhibition, *β-2* thienylalanine. 434.
Vit. A absorption. 562.
alcohol, ester. 676.
thyroid I, reticuloendothelial cell block. 255.
ascorbic acid elimination. 403.
dicumarol, embryo liver, spleen. 646.
folic acid, fat absorption. 171.
K_2 isolation, spore-forming soil b. 136.
nicotinic acid, anoxia. 642.
deficiency, zein amino acids. 564.
pteroylglutamic acid antagonism, erythrophagocytosis. 382.
pyridoxine, desoxy-, reproduction. 274.
thiamine, toxicity. 153.
